

To whom it may concern,

We have used Premier Engineering as our preferred contractor in our Chemical plant, based in Auckland, for the last 5 years. We are happy to recommend them for any maintenance and small construction work.

They deliver a great service at a competitive price and are always willing to go the extra mile.

They have also helped us out at short notice (when we have breakdowns) on more than one occasion.

They have a great team, are knowledgeable of the industry and come up with excellent solutions to our challenges. We have used them for jobs ranging from installation of stainless-steel tanks (with the s/s pipe welding), plumbing, installation of pumps and motors, pipe work, asphalt repairs right through to brick and paintwork.

They are approachable and reliable. When they give a timeframe, it is met.

They are versatile in their services and can do most of the jobs we have to offer.

Regards

Wesley Timms
